

SAUCEDEMO – QA TEST PLAN

Application: Swag Labs / SauceDemo

Application URL: <https://www.saucedemo.com/>

Document Type: QA Test Plan

Prepared By: Shahil

Testing Type: Manual Testing

1. Test Plan Overview

Purpose:

The objective of this test plan is to verify the functionality, usability, and reliability of the SauceDemo e-commerce application. The tests will cover the following user flows: login, product browsing, product detail page, sorting of products, adding products to cart, and checkout process.

Testing strategy:

The testing will be done for the features, user interface, and error handling aspects of the application. This includes testing the expected behavior of the application and its behavior under failure situations. Exploratory testing will also be performed to check any defects that predefined test cases might have missed.

2. SCOPE

2.1 In Scope

- User login & authentication
- Product listing & browsing
- Product details & navigation
- Sorting of product

- Add & remove products to the cart
- Cart item count & cart contents
- Checkout process
- Customer details validation
- Order completion
- Log out

2.2 Out of Scope

- Testing of back end/database
- Testing payment gateway
- Source code testing
- Stress testing

3. TYPES OF TESTING

3.1 Functional Testing:

We have to Confirm that features of the application operate as expected, namely logging in, browsing products, sorting them, adding them to the cart, and checking out.

3.2 UI Testing:

We have Check the correctness and consistency of the visible UI elements, such as product images, buttons, fields, labels, prices, and navigation.

3.3 Negative Testing:

We have to Confirm that application activities with invalid credentials, invalid checkout data, and other invalid input.

3.4 Edge Case Testing:

We have to Test edge cases like an empty cart, repeated actions, weird input, and navigation within the application using Back and Forward.

3.5 Exploratory Testing:

We have to Test the application by going beyond the test cases defined for the project.

3.6 Cross Browser Testing:

We have to Check major application workflows in supported browsers to catch any browser-specific problems.

4. TEST ENVIRONMENT

4.1 Hardware Environment

- Laptop
- Keyboard and mouse
- Stable internet Network

4.2 Software Environment

- Operating System: Windows
- Browser: Microsoft Edge
- Application: SauceDemo / Swag Labs
- Testing Approach: Manual testing

4.3 Application Environment

- Application URL: <https://www.saucedemo.com/>
- Application Type: Web-based e-commerce application

5. TEST DATA

5.1 User Accounts

Username	Purpose	Password
standard_user	Verify normal application functionality	secret_sauce
locked_out_user	Verify locked-account login behavior	secret_sauce
problem_user	Identify intentional application defects	secret_sauce
performance_glitch_user	Observe performance-related behavior	secret_sauce

5.2 Checkout Test Data

- **First Name:** Shahil
- **Last Name:** Mansuri
- **ZIP Code:** 834001

6. TEST CASES

6.1 Test case table

Test Case ID	Test Scenario	Preconditions	Test Data	Test Steps	Expected Result	Actual Result	Status
TC-01	Valid User Login	User is on the login page	Username: standard_user Password: secret_sauce	1. Enter username 2. Enter password 3. Click Login	User should be redirected to the Products page	User was successfully redirected to the Products page	Pass
TC-02	Product Details	User is at logged in standard_user page	standard_user Product: Sauce Labs Backpack	1. Open Products page 2. Select a product 3. Open product details	Correct product name, image, price and description should be displayed	Product details were displayed correctly for standard_user	Pass
TC-03	Product Sorting	User is logged in as problem_user	problem_user secret_sauce Sorting options	1. Open Products page 2. Open sorting dropdown 3. Select sorting options (Dropdown)	Selected sorting option should be applied and products should reorder correctly	Sorting options did not work correctly	Fail
TC-04	Add and Remove Product from Cart	User is at logged in	standard_user Product: Sauce Labs Backpack	1. Add product to cart 2. Open cart 3. Verify product 4. Remove product	Product should be added and removed correctly	Product was added and removed correctly	Pass
TC-05	Checkout Customer Information	User has a product in the cart page	problem_user First Name: Shahil Last Name: Mansuri ZIP: 834001	1. Open cart 2. Click Checkout 3. Enter customer information 4. Click Continue	All valid fields should accept input and user should proceed to checkout overview	Last Name field did not accept the entered text correctly, and the input affected the First Name field.	Fail

7. RISK ASSESSMENT

7.1 Identified Risks

Risk Area	Potential Risk	Impact	Priority
Login & validation	Users may not be unable to perform log in or incorrect login behavior can be occur	High	High
Product Information	Incorrect images or product details may be displayed	High	High
Product Sorting	Sorting options may not reorder products correctly user try to sort the product in respective manner	Medium	Medium
Product routing	The user may be directed to the wrong product	High	High
Shopping Cart	Cart count may not match the actual cart count	Medium	Medium
Checkout	Customer data fields may not accept valid input properly	High	High
Browser Compatibility	Features may behave differently across different browsers	Medium	Medium

7.2 Risk Mitigation

Critical user flow such as login, product selection, cart operations, and checkout must be tested frequently. Defects should be recognized with clear reproduction steps, expected and actual results, severity, and underneath evidence.
